

church construction

Over 30 years experience

Swofford Construction is a well established commercial contracting firm specializing in the construction of religious facilities. We have become a leading contractor of choice throughout the Southeast by providing clients with high quality, value-based construction.

Zero-Item Punch List

In order to exceed your expectations, we have implemented a Zero Item Punch List at project completion. What does this mean? No loose ends. No additional time. No additional money or labor. The project will be delivered to you 100% complete.

Doing What's Right

We take great pride in doing what's right and providing exceptional customer service. We credit most of our success to embracing the "Golden Rule" of treating our clients as we would want to be treated.

Building God's Way

Swofford Construction is honored to be partnered with Building God's Way as Georgia's select builder. In this radically new way of doing business, the architect, owner and builder partner together and assemble a local subcontractor team. Swofford and Building God's Way are ready to partner with you for the selection of land, from the earliest phases of design, through the estimating and permitting phases and then carry your project to completion. We're available for local consultation or for presentations to your board or building committee. Contact us today.

Builder for
Georgia

"Swofford continues to exceed our expectations. As we handle value engineering, change orders and deadline adjustments, Swofford continues to show us how much they value us as a customer. I have worked on many church construction projects, and Swofford Construction has been the best contractor I have engaged."

Michael Ray, Executive Pastor
Dogwood Church
